SOUNDING OF FIRE SIREN MARKING NOON IS DANGEROUS

The Tribune would like to call attention to the danger of sounding the fire siren to announce 12 noon. The siren was installed to call the fire brigade together in case of fire. Suppose a fire occurs at noon. The brigade would not be together and results might be disastrous. It is hoped council will discontinue this practice.

Along the Trail

By J. B. YULE

FORMER G. P. MAN BOARS TO GREAT HEIGHTS

Many residents of Grand Forks and district will recall the time when J. J. Danik, while in the employ of the lumber company, was the first to make a parachute jump from the top of the tower.

Danik owned and operated the "Maverick Hotel," located across the "Wauke," but owing to the depression for market which obtained at that time was forced to close the hotel.

Danik, who is now one of the greatest parachute jumpers in the world, visited L. C. Danik, owner of Lakewood, Ohio, as follows:

"Dear Mr. Porteous: 'Ain't it about time that we tear a few holes into the atmosphere surrounding this locality. We have a fine show lined up and ready for public consumption.'

"While we are at it, I'm going up to 20,000 feet or better for a little while. I'm planning on dropping better than 20,000 feet for a world's record for High Altitude Parachute Jumping.

"I have a brand new creation in the line of parachutes. It's a 30-foot Eagle and I'm calling it 'my tritobolizer.'

"Altogether we will stage a total of 65 jumps per day. There will be 30 in the spot contest, five in the 1,000-foot delay or race to the ground, and 30 in the mass jump. No chute there.

"I often think of Grand Forks and some of the nice people who live here that I have had and met there. There's some of the nice people who live here that I have had and met there. There's some of the nice people who live here that I have had and met there.

PEARL ON THE PLATE

The custom of trying to handle peas on a plate with a fork is just about the most absurd operation one can imagine. It is a waste of time and space to use a spoon in order to make headway.

We are living in an age when wherever possible hot motion is being eliminated. Why not apply this principle to the table? This chasing some around a plate is a waste of a deplorable effort to capture them, especially if one is eating peas. It is positively aggravating and is a by-product of a sense of humor it must be funny.

Whoever started this practice, anyway, is it that fork he invented before supper and we are afraid to reorganize on a practical basis. As I see it this fork-pea custom belongs to the class who have all kinds of time to spend at meals.

Male readers of this paper, have you ever tried using a spoon? If you have not, just wait till your wife half turns her head and see what headway you will make.

Naturally, when it comes to having peas on a plate I am all for the spoon.

HERE'S AN ORIGINAL ONE

I picked up this little story while in search of some items for this column.

A couple (man and wife) were chatting with some Grand Forks friends when the conversation turned to whether a man or woman works the hardest over a period of twelve months.

The lady of course contended that women carry the heaviest load. When it comes to actual work, "For instance," she said, "I have to do the work in the garden and all the housework."

Her better-half, who is a big man in his own defense offered the following argument:

"I like gardening, but the trouble is a line and other garden lady lacks my hands and I can't work for laughing. I'm simply here to quit."

Everybody laughed, including his wife.

IN THE TRIBUNE'S MAIL BOX

RE WEDNESDAY H. F. HOLIDAY

THE YEAR ROUND

Editor of The Herald-Tribune:

As a co-sponsor of the Beaver Lodge radio program I was surprised to hear over the program that you had decided to continue the Wednesday afternoon half-hour through out the year and was appealing to other communities to do the same. I wondered at the time whether this decision was made by the regular merchants and citizens of the village or whether they had consulted the convenience of the surrounding countryside, upon which the pro-

perity of all these small towns depends.

While I readily concede that all the business who used to come from the country to the city is not always convenient for the customer from the country to confine his purchases to these hours. For instance, suppose a binder broke down on Wednesday afternoon and one drove into town to get it repaired. The business closed, how would he feel about it? Or even if he were able to get it repaired but had to return a long distance without any purchase in his hand, would that be very convenient?

I myself am often foolish during the summer by going down Wednesday afternoon to do business only to find everything closed but the bank. The operator is in the post office attending to the telephone but will not sell me a money order. The bank closes on Saturday afternoon; the rest of the town on Wednesday afternoon, and many a time have I been inconvenienced, but especially was it bad during harvest.

One can realize that the clerk like a little time off from their strenuous duties, but could it not be arranged that one would take a holiday one day and somebody else another?

I have in mind a certain country store where I used to go. The owner found it convenient to be open from 8 to 9 p.m. If it is not done the tendency will be to keep open from 8 to 9 p.m. which fails to accommodate its customers to other towns where they are all in the same place employment. It is suggested that the co-operation should be reciprocal.

Yours truly, W. D. ALBRIGHT.

Dad's Notions

By E. S. Stanley

A MESSAGE TO STUDENTS

Let me tell you a pathetic story of an unsuccessful sailor.

A beautiful vessel with all the equipment for successful voyaging had been given him. All he needed for him a joyful trip, and a happy voyage. He had made the time allotted for the voyage more than ample. He had made but little progress towards any port.

With a lump head he tells his story. While learning well of his lessons, he completely missed some highly essential ones—that of expecting some that was not there. He had him from his course of looking for a happy voyage. He had made but little progress towards any port.

Lighter Side of Life

Look Somewhere

Barber: "Was your tie red when you came in, sir?"
Customer: "No, sir."
Barber: "Gosh!"

Why Shout?

"I'm the happiest man in the world," said a man to a friend.
"Well, why wouldn't he be happy with his wife in the country?"

Optimist

Business Man: "If you're not out of my office in two minutes, I'll—"
Customer: "Well, sir, the sailor replied, 'I don't think it is just a momentary spurt, but a change of permanently better economic conditions,' said Mr. Catulle."

Poor Dear!

Mrs. Toots (in tears): "I've waited since I was a baby for my husband to come home, and now it's 6:30."
Mr. Toots: "And when were you to meet him?"

Permissible

An express train had just glided slowly through a station when one of the passengers, stretched to himself, said: "What a beautiful view of the country!"

Some Learning

W.P.A. Foreman: "That new man who came out yesterday has brought three shovels along."

A Long Leg

The first officer called a deckhand to him and said: "Go below and bring up the anchor. The anchor is a long one."

Here and There

Nearly 400 types of clothes now are produced in the United States.

The polar exploration ship Fram is preserved in Norway as a monument to the Norwegians who came to the North Pole.

In one day 100,000 was raised in England for the Submarine Disaster Fund.

A sugar beet is about 75 per cent water.

Forty-eight per cent of the business and professional women in the United States have relatives whom they support, in whole or in part, by their earnings.

A piece of 2,000-year-old lead water pipe from Rome is in New York's Museum of Science and Industry.

Onion leaves are thought to pour water straight down to the bulb.

Soviet whalers plan to catch at least 500 whales this year.

Eggs are boiled by electricity without shells with a new household device.

Approximately 50,000,000 gallons of oil are being consumed commercially each year.

There are more than 2,500 species of snakes in the world, and about 100 of them are poisonous.

Bats have a higher temperature than any other creature; about 112 degrees. By holding their wings close to their bodies, they are able to withstand bitter cold weather.

To encourage a systematic production of wheat a government board has been authorized to control and limit the importation of wheat from other countries.

Over 80 per cent of corn entering the United States comes from Argentina and the Danubian countries.

Canadiana

Permanentist Bar-

Toronto.—Premier Pattullo of British Columbia, here for the first time since his resignation, said he was pleased that the federal government was not in a hurry to get him back.

Western Independent.—The Canadian Wheat Board set as a central selling agency was reduced by the federal government, but A. M. Shaw, director of federal marketing service, is discussing plans for handling the wheat crop with western pool and grain organizations.

While no announcement has been made, it is expected that a central selling plan is under consideration whereby existing co-operatives and grain organizations.

The Snapshot Guild

Vacation Diary—In Pictures

Make your vacation "picture-diary" complete. Take general views and scenes—but get "fun" pictures and close-ups, too. And snap interesting details of places you visit.

Each of us at some time or other, has had a diary. Have you thought of using your camera for this purpose? It's a good idea at any time, but now, at vacation time, it has special point.

Look back over your vacations for the past few years. How good picture story of each vacation did you get? Does your picture album show all the things you did—all the interesting spots you visited—the fun your group had? Or is the record rather spotty, and the pictures too much alike?

Chances are, you missed many opportunities. Perhaps you took a lot of pictures, but they were all of the same kind—shots of the same old things you saw every day.

For this vacation, here's a better method. As you snap out your vacation plans, jot down picture possibilities in a notebook—one emblematic to keep with you. Note down the things you want to remember—parking, departure, points of interest on route to your destination, things you will do each day after you arrive.

If you're taking a motor tour, also note down in advance the interesting or different features of the country through which you will pass.

mountains, prairies, big trees, palms or moss-hung oaks, gorges and canyons, or whatever you expect to see. Then resolve to get good pictures of these revealing features.

If, perchance, you're taking a cruise to another land, make similar notes of things you'll want to picture—the people, national dress, public feasts or celebrations, interesting types of architecture, the different aspects of the country you'll see.

As you're visiting places of historical interest, or a special current interest—such as the White House—note down the buildings you'll want to shoot, and other details you'd like to keep in pictures.

And, on vacation, keep this notebook and your camera handy. Concentrate on getting pictures that really tell the story of what you saw and did. Don't take general views exclusively—single out details that especially interest you, and get close-ups of them. Shoot as many pictures as are necessary to make your vacation record a true "picture diary."

That's the real way to picture a vacation. Try it—and you'll build up an album to show your friends that is genuinely worth while; an album to treasure for years.

agencies will pool their marketing facilities.

Spotlight Wanted.—Salaries paid to teachers in the province of Ontario, a committee of the Ontario Teachers' Federation, representing 40,000 members of the profession.

Calling for a national survey of the profession, the report of the Ontario Teachers' Federation, representing 40,000 members of the profession, the report of the Ontario Teachers' Federation, representing 40,000 members of the profession.

For War or Peace.—Regina.—Should war come again, wealth and industries of Canada should be considered just as we said W. W. Kennedy, K.C., before the convention of the Imperial League recently.

Profits should be taken out of war, said the Winnipegper, and purchase of tax-free bonds should no longer be considered a fair contribution to the winning of the conflict. The state should take control of vital industries, he said, and allow only a reasonable return on invested capital.

Tit for Tat.—Speaking to several thousand farmers from New South Wales, Ontario, Lester B. Pearson, Conservative leader, said that anyone who attacked British and American people are no longer welcome in the Orient, said the collected speech.

Western Independent.—The Canadian Wheat Board set as a central selling agency was reduced by the federal government, but A. M. Shaw, director of federal marketing service, is discussing plans for handling the wheat crop with western pool and grain organizations.

While no announcement has been made, it is expected that a central selling plan is under consideration whereby existing co-operatives and grain organizations.

Eastern Gossip.—S. J. Boyd, Mayor of Newmarket, defended Premier Bennett's statement that a Conservative party picnic here would be a "big success."

"I say if a government is able to pay three per cent on its obligations, it can pay three per cent on its obligations, it can pay three per cent on its obligations, it can pay three per cent on its obligations."

And Then?—The relief pay cheques for 700 men and food vouchers for 800 women on direct relief in this city were distributed by the province government here last week.

At the end of the week, the relief pay cheques for 700 men and food vouchers for 800 women on direct relief in this city were distributed by the province government here last week.

Happenings.—Parliamentary vacancies in the House of Commons, while a large number of administrative vacancies remain to be filled by Prime Minister King and his government.

There are five vacancies in Quebec, two in Ontario, and one each in Saskatchewan and Manitoba. Vacancies in the Commons are two in Ontario and one in Quebec.

Who Was America's First Billionaire?—Some people might think that it was John D. Rockefeller. Others might guess that it was Andrew Carnegie. But the answer is John A. Sutter, who was the first to make a fortune in California.

John A. Sutter colonized a large section of California, receiving huge land grants from the Mexican government. He added to his holdings by purchasing from Bear River to the Russians. All this domain was his before the United States acquired California.

By 1848 he had built up an enormous fortune in irrigated farm lands, orchards, vineyards, lumber mills and cattle. In that year gold was discovered on his property.

Interesting News From Sexsmith

Vol. VIII, No. 9

By R. A. MACLEOD

August 15, 1939

New Pupils Must Have Medical Examination

Here is good news for the kids: The Sexsmith school will open for the Fall Term on Monday, September 4.

All pupils entering the school for the first time must show evidence of having been vaccinated during the past seven years, and also have a medical examination.

Beginners must be the full age of six and will be seven before the end of the term, June 1940.

Parents of children entering school for the first time are requested to kindly get in touch with the secretary, G. H. Sharp, as soon as possible.

HYTHE PARTY STRUCK WITH GARDENS AND TREES HERE

Mr. and Mrs. Jimmy Grassick received a pleasant surprise on Sunday morning last when three carloads of friends and neighbors from Hythe came over to see them.

The visitors were Mr. and Mrs. M. Chayne, the Roberts family, the Fransen family, and Miss Flom.

They called at the home of Mr. and Mrs. Art. Fenton on their way home in the evening and were greatly taken with the lovely gardens and trees of Sexsmith.

SPEND DAY WITH SUBETENS

Mr. and Mrs. J. N. Olson and family took a trip out to Sudenland at Tupper Creek on Sunday last. John can speak the German language and he had quite an interesting conversation with some of the new settlers.

Harold Olson, who also can talk German, is visiting with one of the families there, Mr. and Mrs. Wm. Lorne, to brush up on his language.

SEXSMITH LOCAL PARAGRAPHS

Mrs. Paul Hudak and family returned on Friday's train after a two weeks visit in Edmonton.

Mr. and Mrs. Henry Salter of Whitehall are visiting at the home of their son-in-law and daughter, Mr. and Mrs. H. Brubacher.

Mr. and Mrs. Dave Sutherland spent the week-end at Pouce Coupe and Dawson Creek.

Margaret McMillan is visiting at Beaver Lodge, the guest of Connie Hodge.

Jack McKenzie of Teepee Creek has purchased a new house on the corner of Foster Street and Main Avenue from T. A. Moodie and has moved the family in for the school term.

Mrs. Margaret Little of Noranda, Quebec, is visiting at the home of her brother and sister-in-law, Mr. and Mrs. Reg. Little.

Mrs. Clara McDermott left by car for Edmonton on Thursday with Mr. Bob Johnston. Bob has gone after his daughter Ruth, who has been visiting with her sister Gwen.

Mrs. Alex Stephens has been appointed manager of the shipping department of the Balderston Dairy, succeeding Mr. Ray Brown.

Mrs. M. Thacker and two children, Mildred and Marlene, of Edmonton, have been visiting with her brother-in-law and sister, Mr. and Mrs. Chas. Tesar, for the past two weeks.

FAUST NEWS

FAUST, Aug. 14.—Miss Mallam, the Bishop's Messenger, left for a vacation at the end of last Tuesday night.

W. H. Bannister, Jr., the pioneer garage-man of Faust, and Miss Carol Halwa of Grande Prairie were married Wednesday afternoon at last week at High Prairie. The wedding party consisted of three auto loads of people from Faust. The bride, Miss Halwa, is a daughter of Mr. and Mrs. J. H. Halwa, a tobacco merchant is expected to buy and locate in the Peace River area.

The boys attending camp at Spruce Point under the leadership of Rev. Mr. Wingfield of Kinuso returned home Friday night.

INJURED IN RUNAWAY

Mecheater Baker's team took fright in the hay field, and finding himself unable to control them, he headed them for a tree and that is the last he knew for three hours. Though gathered unhitched the horses, he managed to get them out of the hay field and put the horses in the stable and fed them. He knew nothing of what he was doing. He had received a bad bruise on the side of his face and now appears fully recovered.

JEAN TRAVELS OF ENLIDA IS VISITING

Bertha Stanley here.

BEGIN FISHING AGAIN.

Fishing starts again tomorrow, the 15th. Commencing on August 15, the most interesting to close difficulties made it impossible to close down. Many only lifted their nets one, none more than three times.

One person caught 7,000 pounds at one lift. It being very hot weather, the fish were schooled in deep holes and knowing where these holes were the fishermen made their great hauls.

Mrs. Bill King and children are spending the week-end with her parents at Swan Lake Valley.

A Close Shave

Rastus had returned to the house earlier than usual, and a male friend of his wife had hidden as best he could under the sofa.

On entering the room Rastus looked slowly round, and then fell in his pocket, producing a wicked-looking razor.

"What you all goin' to do, Rastus?"

"Dinah," he said, "if dem feller stutted out dere don't belong to nobody, I is goin' to shave."

ASPEN GLEN AUTO CAMP NEWS

ASPEN GLEN AUTO CAMP, Aug. 14.—Among those camping here or met were:

Alex Dunn, Edmonton; E. G. Nelson and Milo Melvin of Vancouver and Vermilion.

Mr. Drun, a locomotive engineer, wife and son Pat, of Edmonton.

Mr. and Mrs. Ripley starting on their vacation trip from Rola, B.C.

Mr. Moore, Grande Prairie; G. A. Sparrow, Progress, N. B.; Rickard, Wright, and J. Scott, Dawson Creek.

Mr. and Mrs. Roy Coyne of Dawson Creek, with Max, Wil, and Phyllis.

On the way to harvest fields eastward were A. Neptad, Mark Han, Osmund Trygal, and E. N. Torson, all of Vahlala Centre.

Rev. and Mrs. K. A. Knutson, moving from Sexsmith to Gabri, Sask. Elmer Andersen, La Glace.

B. Gudner, High Prairie, and W. G. Willcott, High Prairie.

The Bishop's Messenger, Miss Stewart of North Star, on her vacation.

Mr. and Mrs. E. Kelly, Leduc, and W. Foreman of Edmonton.

Allan M. Clark, Berwyn, Heber G. Keat with two others on their way to the city.

A. Pearson of the Pearson Truck Service, Hythe, had to leave half his load at a point east of here on the way home.

Driving up from Canyon Creek Sunday, Mr. and Mrs. Lew Morrison were showing their guests about the country. Earl and Stanley Anderson, fish buyers from Lake Manitoba, stopped there while on their way to investigate the Far North.

Paul and Mrs. J. H. Halwa, a tobacco merchant is expected to buy and locate in the Peace River area.

WANHAM NEWS

UNITED GROWERS' FREE SHOW AT WANHAM

WANHAM, Aug. 14.—On Tuesday evening, August 8, the United Growers Company treated all Wanhamers to a free show, and E. Young, who was in charge, assisted by J. C. McNeil, explained that the United Growers Company in appreciation of the support the farmers of the district have given the United Growers elevator here.

The whole show was very interesting. The first reel showed pictures of the visit of the King and the Queen to Canada, and the United States, and was appreciated very much by those present, as there were very few in the audience.

The second picture, showing Grey Owl with his tame beavers, was very popular. The first reel showed pictures of the visit of the King and the Queen to Canada, and the United States, and was appreciated very much by those present, as there were very few in the audience.

The third picture, showing grain from the time of seeding until made into bread, also showing some of the hazards the farmers have to contend with in raising wheat, and also the various inspections which the grain is subjected to in order to get the correct grade.

The fourth picture, a Laurel and Hardy comedy, went down with the kiddies and they sure showed appreciation to the United Growers Company for their kindness in making the show available for free of charge.

Miss Dorothy Grant of Calgary has been visiting her sister, Miss M. Grant, District Nurse.

Cutting will be general in this district by the time this appears in print and the crop in this district are of a very high average.

EAGLESHAM NEWS

EAGLESHAM SPORTS

EAGLESHAM, Aug. 14.—A small crowd attended the Eaglesham sports due to cloudy weather.

The Belloy men took the cup by winning over Fox Creek and Four Mile, 15-9.

In the evening the dance was well attended. Music was supplied by Lionel Leroy of Girouville and Mrs. Carl Johnson of Watloo. The dance was well from start to finish.

ATTEND CLINIC AT BELLOY

Mr. Forget, our Eaglesham merchant, took a carload of people up to Belloy on August 7, where they attended the clinic there. They returned home on August 8.

LOCAL BRIEFS

Lloyd Childers and Lester Webb left for the prairies, where they will start at next week.

Bill Childers was staying home while his mother was away for two days.

Mrs. Empson and daughter went to Brownvale on August 6 by car.

Oliver Wilson of Brownvale, who has been visiting here, returned home August 6 by car.

Miss Johnson of Sexsmith has been visiting Mr. and Mrs. Carl Johnson of Watloo.

Betty Childers has been over

NEW PHOTOGRAPH FROM THE TROUBLE ZONE IN FAR EAST

The International Bridge at Tientsin, North China. This bridge connects the French Concession and the British Concession with the special area through which traffic must pass to reach the district here.

working at McIntyre's while Mr. and Mrs. McIntyre have been having.

Relatives of the Bruce family are up visiting from Edmonton.

The Sunday school ladies have been visiting the district families in the districts here.

Gilbert Bice of Fox Creek went to the hospital with an injured hand. It is reported that a disc ran over it. We hope it will soon be better.

PIPESTONE CREEK

MR. FOULDS AGAIN VISITS SOUTH WAPITI DISTRICT

PIPESTONE CREEK, Aug. 14.—Evidence of the importance of the South Wapiti alfalfa seed was seen during the week-end when the district was favored by a further personal visit of Mr. Foulds, high official of the Dominion Seed Inspection Branch. Mr. Foulds made a thorough survey of the neighborhood and took the opportunity to have a talk with each one of the growers.

BOW-WOW

The pack outfits and dog trains that have left here throughout the week-end, but no sign of Porcupine may soon be a thing of the past; we shall instead be able to travel by motor.

It is learned that the provincial government will start work immediately on a wagon road to Fort Porcupine.

TWINKLE, TWINKLE LITTLE

The gravest anxiety for the safety of Friday night last when at a late hour he had failed to return home.

A search party was organized by his sister Myrtle (who will be remembered as Mrs. Eng, a leading member of the "Obstinate Family," which was successfully staged here a few weeks ago).

Searchers visited practically every home in the country, but no sign of the missing man or of Mrs. Eng's car could be found at 5 a.m. his death was presumed.

Next morning, however, Mr. Loftstrom was seen travelling at high speed in the car. It was learned later that he had spent the night with Mr. Carl Berg, who is already well known to be a student of astronomy. Mr. Berg's car was fitted out as an observatory and is equipped with a large telescope. Last night Mr. Berg discovered several new stars when his limousine leaped off a bridge and he found himself sitting in a pool of water with his head through the roof of the car.

MORE TWINE SOLD THAN LAST YEAR

Cutting of wheat started here today, but was temporarily abandoned as the grain is on the green side yet. There appears to be a good crop of grain this year that will average 25 bushels to the acre. Alfalfa seed yield will be considerably heavier than last year. Sales of binder twine will be more than double last year's.

HUALLEN NEWS

Dan and Anne Get Big Send-Off On Wedding Day

Newlywed Don Chaps, Spurs and All in True Western Style And Slip Away On Horseback For Brief Camping Honeymoon.

HUALLEN, Aug. 14.—A wedding of more than local interest took place Sunday, August 13, at the Anglican Church, Wembley, when two popular members of Huallen's younger set—Dan and Anne—were united in marriage.

Mr. and Mrs. Dan Chaps, Spurs and All, eldest son of Mr. and Mrs. Frank Wilsey of Aspen Dale—were united in the holy bonds of matrimony by Rev. R. L. Sandcock, rector of the Wembley parish, officiated.

The bride, who looked radiantly happy, was becomingly attired in a dress of navy blue tulle and carried a bouquet of white sweet peas and purple asters.

The bridesmaid, Miss Nellie Childs of Grande Prairie, sister of the bride, was attired in rose pink crepe and carried a bouquet similar to that of the bride.

The bridegroom was supported by Mr. William McAusland of Wapiti.

After the ceremony, which was witnessed only by the immediate relatives and a few close friends, the wedding party and a large number of friends met at the home of Mr. and Mrs. Frank Wilsey, where a delicious luncheon was served.

Tables were set up on the lawn. The bride and groom, accompanied by the bridesmaid and groomsmen, were decorated with sweet peas, asters and white flowers, with a lovely three-tier wedding cake the centre of attraction.

The sumptuous feast guests were indulged in by the younger guests, while the others visited with each other. Many pictures of the happy newlyweds and guests were taken by the history of cameras that was in action during the afternoon.

The evening was spent in social intercourse and another serving of luncheon and refreshment interspersed with music supplied by an orchestra.

During the evening the newlyweds, in true western style, slipped away on horseback, chaps, spurs and all, for their brief honeymoon.

At twelve midnight a very happy party dispersed, but before doing so "God Save the King," "My Country 'Tis of Thee," and "Auld Lang Syne" were lustily sung by the departing company, who all wished the newlyweds a real life send-off at the start of their matrimonial career.

Here's wishing you, Dan and Anne, all the luck in the world.

Among the distant guests present we noted were Mr. and Mrs. Alf Childs and family of Grande Prairie, Mr. Wm. McAusland, Wapiti, Mr. and Mrs. Ray Woods and son Archie, and grandchildren, Miss Charlotte Eggenberger and Master Robert Woods, all of Madison, Wis., U.S.A., and Cliff Kimmerly of Grande Prairie.

Mrs. W. Hardie and daughters, Audrey and June, of Edmonton are visiting at the Cassidy home.

GETA HONORS IN ART

High school students are beginning to get their exam results in the mails and we noted Margaret Clow the reader her diploma after its receipt in the mails. In art Margaret got honors and rated high in other subjects. Congratulations.

MR. AND MRS. IVAN FAWKES GOING TO COOKING LAKE

Mr. and Mrs. Ivan Fawkes of Mountain Trail are leaving the district for Cooking Lake, Alberta, where Mrs. Fawkes has received an appointment as teacher. We wish them both much success in their new sphere and hope that Mr. Fawkes' health will continue to show improvement.

Mr. and Mrs. Everett Shortt and family of Taylor's Flats, B.C., were

ANGUS CLAYTON CUTS FIRST WHEAT

Harvest has begun in this district. First to begin cutting wheat is Angus Clayton of Aspen Dale, who started on his Gravel wheat Wednesday, August 9. All grains are ripening fast with the present hot weather and cutting became general today, Monday, August 14.

YOUNGER SET ENJOYS WEINER ROAST

Miss Mary Jane Harrel invited a few of the younger set to a weiner roast at the Beaver Lodge river last Friday evening, August 7. Games, swimming, and campfire stories all contributed to making the evening a delightful one for all.

Those invited were: the Misses Evelyn Thorsen, Marjorie Wilsey, Eva Clayton, Marie Boyd, Frances Wilsey and Mary Jane Harrel, Messrs. Ray Wilsey, Seb. Smith, Marion Grubb, Otto and Eddie Schaeckel, Len Kaufman, George Clayton, and Gordon Boyd.

U.S. VISITORS ENJOYED TRIP

Motoring here from Madison, Wisconsin, Mrs. W. B. Woods and son, Archie, and grandchildren, Miss Charlotte Eggenberger and Master Robert Woods, visited at the home of Mr. and Mrs. Frank Wilsey. Mrs. Woods is a sister of Mr. Wilsey. The Woods said they had a very enjoyable visit here and hope to return again in the near future. They left last Monday on their return journey home.

GOOD MUSIC AND GOOD EATS

A very enjoyable dance was held at Mountain Trail school-house last Friday evening, August 11, when Mrs. Huallen attended and there was plenty of good music provided, also eats.

SEEN AND HEARD

The scribbling out of a new brand of "makins" ("Hull Durham," native grown).

MILLARSTON

MORE WINS FOR MILLARSTON

MILLARSTON, Aug. 13.—Well Wembley Wilsey, assisted by two or three players from the Blues, journeyed to Millarston to try once more to get revenge from our local ball losers, but went home disappointed after one of the best games of football seen in this country this season. The score was 3-2 in favor of Millarston.

The Case Eagles, with the help of several players from other teams and also the popular sports commentator from C.P.O., Bud Powell, but minus their manager, then crossed balls with local boys and lost some more of their wing feathers at the end of a closely contested game to the tune of 8-10.

The Case Eagles then took the Wembley team in a very close game by one run.

A large crowd of fans witnessed these three best games of softball played on one field in one day for a long time.

Ferguson as base umpire in the three games and Edgar Jebb, Archie Eggenberger and Master Robert Woods, all of Madison, Wis., U.S.A., and Cliff Kimmerly of Grande Prairie.

The Millarston boys have accepted the Buffalo Lakes boys' challenge for a sudden death game at Cooper's Point, Bear Lake, next Sunday, which will be the last game of the season, as we will all be harvesting by that time.

CHANGE PING TO PLURR

by cleaning out carbon as you drive

TRITON MOTOR OIL

100% PURE PARAFFIN-BASE

Try it today!

Trition forms almost no new carbon. Actually allows your motor to burn away the excess carbon deposited by other oils. The motor generally loses its carbon plug within 2 to 3 thousand miles!

And, at the same time, it gets the protection of a 100% PURE PARAFFIN-BASE OIL—the finest type of lubrication today can buy.

Ask for Trition next time you refill.

The Holiday of Escape

By W.C. Pratt

After you pass the Canadian border as you enter the United States you travel along the St. Mary's River. It is so named after a famous nun by that name who was a Sister of Mercy in the early days. A large school has been established there which is known as St. Mary's. High on the mountainside there is a distinct projection on the face of the rock made by nature. It is the image of St. Mary. Not having seen this person or even a photo, all I can say is the profile is distinctly of a woman's face.

We stayed one night at Pocatello, Idaho. We had a cabin in a trailer camp. A chap who lived in a trailer was a plasterer. He told me he lived in the trailer the year round and moved to where there was work. The trailer was \$1.50 per hour and he worked 12 hours per day. He had not been out of work for two years but don't tell Bert Powell or Tom Massee. Carpenters likewise get \$1.25 per hour. Wages are high in the south when they do get work.

Boulder Dam

You cross part of the desert before you come to Las Vegas, where you turn off the main highway to go to Boulder Dam, which is 30 miles. It is impossible to see Boulder Dam without crossing a stretch of desert. I might here be told that in taking the short-cut from Salt Lake City to Los Angeles you have to cross desert for almost 300 miles, and it is hot. Many make this drive at night, but you must pass up seeing Boulder Dam, one of the wonders of the world. I cannot properly describe this crossing. I thought it was exaggerated, but after making the crossing, which took us practically all afternoon, I can assure you what you have been told about it is not exaggerated. Do you remember in Morrison's Cash Store when they had the big register that came up direct from the furnace and it was cold outside, and about the time the third person came in and complained about the cold and Hector went down and loaded the furnace, opened the drafts and the heat that would come up the register? Well it was something like that being blown into your car. It was terrible. We got through, but it was an endurance test.

As I stood and looked at Boulder Dam I thought of the story of the American who was over in Scotland for a trip. They showed him the post office in Glasgow. He said it was very nice, but over in the United States you had big post offices. It was the same with everything they showed him. Finally they

showed him Loch Lomond. "Well," he said, "this is wonderful. I don't think we have anything in the United States quite as beautiful." "Well," said the Scotchman, "if you could suck as well as you can blow, it would take you very long to transfer Loch Lomond over, and then you would have the most beautiful lake in the world in the United States."

It is different with this dam. It speaks for itself. It is the most wonderful structure in the world. It is 7,264 feet high. At the bottom it is 660 feet thick, and contains 3,250,000 cubic yards of concrete. It backs up the Colorado River 114 miles, forming a lake known as Lake Mead, which is the world's largest reservoir.

It took five years to build the dam, giving employment to 4,000 men. It is built in Arizona and half in Nevada, as the place is marked in the center of the dam. You pay 25 cents to have a guide show you around. You are taken in parties down an elevator 528 feet and are shown around. The guide speaks in millions only.

This dam will provide power for all southern California and water to Los Angeles. It is owned by the federal government. It cost \$38,000,000, and will, according to estimates, repay the money back to the federal treasury in 50 years.

I will repeat again, if you have never seen Boulder Dam, there is one of the wonders of the world you have missed.

We arrived in Los Angeles in seven days driving from Grande Prairie or five days from Edmonton. If you are fond of crowds and congested traffic, you should live here. Thousands of cars going in every direction and every driver in a hurry.

After a short visit with friends—Mr. and Mrs. George Horner of the late Mr. Horner, a daughter of the late Mr. A. Patterson and paid the Peace River country a visit about 15 years ago. They were interested in Grande Prairie, when we called. Tompkins, wagged long into the night. Bill Haynes is attending college and in about six years should have M.D. after his name.

I have been accused in former travelogue articles of visiting a lot of cemeteries. I love them for their historical records. Forest Lawn

TO REPRESENT OTTAWA

Mary Ann Burns, who won the Ottawa elimination for the non-stop International Typewriter Marathon at Toronto's Canadian National Exhibition. She is the first to be chosen of a team of twelve Canadians who will begin to pound one typewriter day and night for the full two weeks of the Exhibition in competition against a dozen speedy typists selected from the United States.

Waterworks are in stores one cent per pound, and from peddlers you get a 24-pound watermelon for about 10 cents. Cantaloupes five cents each, and all other fruit accordingly. I saw oranges similar to what were sold by peddlers in Grande Prairie at three dozen for \$1.00, here three dozen for 10 cents.

Next week I expect to be at San Francisco Fair and will give you a short description of it.

Hollywood cemetery is another beautiful sight. In this cemetery is the grave of Rudolf Valentino. Every year this grave is visited by a mystery woman. Her name can never be learned as she comes heavily veiled and after paying her respects to the grave and placing a rose near the head, disappears just as mysteriously as she arrived. In Forest Lawn cemetery is the crypt of the famous actress, Jean Harlow. When he is in Hollywood Win. Powell visits it every week and places fresh flowers, among which is always a white gardenia.

One could easily remain in Los Angeles for one year and visit a new place of interest every day. There is a bowling alley with 52 alleys; the Columbia Broadcasting System's building, which cost over a million dollars; Albee Semple McPherson's temple. Albee is still a big power in religion and politics. Every move he makes publicly is highly dramatized. There is Long Beach, where brothers are there by the thousands. Men walk around with just the bottom part of their pyjamas on, and leave off practically everything.

In our sojourn around the city we have very efficient driver, Mr. Geo. Horner. The way he can dodge around and in through traffic would make a New York taxi driver blush. He knows Los Angeles like a dog knows his flea.

On Long Beach there is a platform erected beside the driveway about thirty feet square. It is level with the driveway, with a small pulpit at one end and seats all around. It belongs to the Spit and Argue Club. It is usually crowded with old chaps who have ideas of their own and every subject is discussed from politics, religion, down to the weather. One is allowed ten minutes to talk. He mounts the rostrum and after ten minutes there is the question period of ten minutes, and then he can go ahead. They tell me it is fast and furious some times.

The organization here known as the Ham and Egg Club is doing strong. This is a scheme to pay every person over 50 years of age 50¢ every Thursday. Whether it is feasible or not I do not know, but one thing certain is it is growing in strength like Social Credit did in our country at the beginning.

THE WORLD OF WHEAT

By H. G. L. Strange

Director, Research Dept., Seattle

No Reason ...

Continued from Page One

He pointed out that at the outbreak of the Great war wheat price advanced to \$3.00. The government then took control and set the price at \$2.21, thereby interfering with the farmer getting the maximum price which was determined by the demand.

"This was the reason why the price was set," observed the speaker, who then referred to the setting of the price of wheat for 1938 and 1939. It was stated by the Minister of Finance, Mr. Dunning, that in 1938 setting of the price of wheat cost the government \$30,000,000, said Mr. McCrory, who added that he did not agree with Mr. Dunning's statement. "Mr. Dunning had said that the velocity of money was 20, and that the government really did was to eventually grab off the so-called surplus and put it in the other pocket with the circulation of the money, everyone was just that much better off."

Mr. McCrory made it quite clear that he was not in favor of a wheat board as a permanent institution. "The speaker then took up the matter of the low price being offered for oats and barley. As far as he was concerned, he did not want his agents to take in these grains at such a deplorable low price. He advised farmers to store their barley and oats at all possible.

Speaking of the work of the Research Council, Mr. McCrory was hopeful that through the efforts of this organization new uses would be found for grains and this would mean the broadening of the market. Unsettled conditions in Europe were blamed by the speaker as the cause of interfering with the natural avenues of trade. If the countries of Europe would get on a peace basis, he said, this would largely solve the problems of the wheat grower. Mr. McCrory scoffed at the idea of

the price of wheat, the records show, is today lower than it has been since the year 1920, when it was equivalent to about 20 cents a bushel as late as 1920.

The present low price is the direct result of the wheat surplus today existing in the world.

How much is the surplus? The whole world produces and consumes, each year, approximately 5,000 million bushels of wheat. The surplus, or unwanted surplus today, is, however, not more than about 500 million bushels, or no more than sufficient to furnish the people of the wheat-eating world with about 10 days supply.

Surpluses equal to this per person in the wheat-eating world, in the past, and always people have been accustomed to this how quickly the surplus has been absorbed would ensure for years have disappeared. The reason for this is that the surplus has been absorbed, and that the present surplus is the result of the war, as was the case with the surplus in 1918-19, when it was as large as the surplus today. Any slight climatic change, or crop in any large country, therefore, would soon make the surplus surplus surplus impossible.

Following factors have tended to reduce price: Considerable decrease in wheat and flour stocks abroad for Europe—most of Hungarian wheat surplus absorbed for Germany and Italy—no overhangs of Russian new wheat crop, which is believed only moderate unfavorable crop and weather reports from Europe.

Following factors have tended to lower price: Belgium, further increases import duty on foreign wheat—Japan's wheat crop exceeds self-sufficiency plan—Russia of Argentina and Australian wheat—German rye, wheat and potatoes in large quantities to be far above average—Indian apple crop about one-third larger than a year ago.

Taking into account the topography, climate and present distribution of plants in Canada there are at least six fairly well defined flour regions in the Dominion—Arctic, Northern, Southern, Eastern, Western and Prairie.

Canada moved up to fourth place in importance as a source of supply for imports in the Dominion of South Africa, displacing Japan, and coming after the United Kingdom, the United States, and Germany, in the order named.

HEAVY COMPENSATION ITEM

EDMONTON, Aug. 14.—"Oh, it's nothing! Just a scratch!"

But just a scratch and comparable small cuts and abrasions were a heavy item last year for organizations that pay compensation to employees, says the Alberta Safety League.

The 1938 edition of Accident Facts, the National Safety Council's statistical year book, shows:

"One out of ten compensated occupational accidents involves infection. Many of these cases begin as small scratches or lacerations that would have remained in no disability if proper medical treatment had been given promptly."

CKK, PRAIRIE REGIONAL STATION HAS WIDE RANGE

A coverage greater than any station of its size, or even bigger, is claimed for the new Canadian Broadcasting Corporation's prairie regional station, CKK, at Watrous, Sask.

Because the station operates on a clear channel, and has a choice position on the dial, because it is covered near imperceptible and without atmospheric disturbances, and has ideal atmospheric conditions, it is heard over most of the continent. It is anticipated that full-time coverage with reasonable quality will extend west and east from the rocky mountains to the Atlantic coast, and south well into the United States, with favorable atmospheric conditions there is the reason CKK could not be heard in the Arctic Circle. At any rate, it is available to every radio listener on the prairies.

Although early in the season for good radio reception, CKK is already gaining time for itself in the prairie country by its high quality transmission. In many places it is the best heard station on the dial. The use for the new government-owned station was chosen by experts from the Department of Transport, material and deposits around Watrous, Saskatchewan, and it is an idea upon which a radio transmitter. Some experts believe the soil and the salt deposits will make this station one of the best in the world.

It is the fourth of the 50,000-watt transmitting stations which will bring daily to hours of broadcast service of the best programs from the United States and other parts of the world, as well as Canada, so radio listeners of the Dominion.

Between the Watrous and Saskatchewan, there are sister stations at Vancouver, Quebec, and Hornby, Ontario, erected last year and equipped with the most modern apparatus available. All these stations were carefully chosen to provide a maximum coverage of the geographical area they were designed to serve.

Thinking of Feelings
Rejected suitor: "No, no, I can't give the back my ring. After all, what's a dollar and a half to a man with a broken heart?"

A Case of Time
"You were a long time coming to the door, Jane," complained her mistress.
"Oh, mum, I was extra quick! I was a bit late starting."

No Difference
"You must run your husband terribly when he's travelling."
"Oh, no. I just keep a newspaper in front of his plate at breakfast and I don't know his way."

Can't Help It
"So you're a George Washington," the old lady asked the small negro boy in an American hotel.
"And you're to be exactly like him, or as near it as possible?"
"Why, like George Washington?"
"Ah, ha! You're a George Washington, 'cause dat's who Ah is."

Everything's Fine
The first deaf motorist was drawn up by the side of a newspaper and the second deaf driver passed him and stopped. The second called to the first.

"Have you run out of gas?"
"No," shouted back the first, "I've run out of gas."
"Oh," yelled the second, as he drove on again, "I thought you might have run out of gas!"

Mr. Smith: "My wife came from a very large family. Did yours?"
Mr. Brown: "No, she brought it with her."

HE LOVES THEIR DELICIOUS FLAVOUR.. AND I KNOW THEY'RE GOOD FOR HIM

AERONAUTICAL TIT-BITS

By J. W. Neil

ERRORS OF JUDGMENT

A well-known commercial air pilot expressed the following view recently: If all the accidents due to errors on the part of the pilot were eliminated, flying would be the safest mode of transport ever invented.

His remark is both true and false. It is true inasmuch as it is based upon statistics of accidents; but false inasmuch as it is based on the actualities of accidents. For what is an error of judgment?

In every manipulative process, from skidding to surgery, there are errors of judgment. They occur in every action. They are unavoidable. But there is a sort of line drawn between the error which is so large that its consequences are serious, and the error which is so small that it passes partly or entirely unnoticed. If it is admitted in flying, for instance, that an error may be unavoidable owing to the limitations of human abilities, then it will be clear that the aircraft must be such that it will allow that error without evil results.

The enormous number of air accidents attributed to an error of judgment on the part of the pilot may, with equal truth, be attributed to requiring from the pilot an accuracy and correctness in circumstances, beyond ordinary human.

The problem of the aeroplane designer, therefore, is to produce a machine which shall in itself have those many safety characteristics which would neutralize all unavoidable errors of judgment on the part of the pilot, and all errors which are so small that no human being can be sure always to avoid them. It is the fact that some of the finest pilots in the world have been involved in bad crashes through what are glibly called "errors of judgment." They may have flown for thousands of hours before without accident and shown the highest class on all occasions; yet there may come a time when their skill seems momentarily lacking or when the circumstances present a problem which is beyond their solution, and they have an accident.

It is right, then, to describe the event as an error of judgment on the part of the pilot and to dismiss it? Would it not be more accurate to reason as follows: This pilot was known to be a man of exceptional skill and vast experience. He was one who exercised the utmost care at all times. It is on this particular occasion he found himself in such a flying position that a crash could not be avoided, then it is only possible to conclude that a degree of skill was demanded of him which is beyond that which can be expected on all occasions from anybody. The true cause of the accident, therefore, lies not in the man, but in the machine.

That is the view which, we believe, should be carefully examined whenever accidents happen. It may be that sometimes it will be found that the pilot, through some momentary but unusual lapse may be said to be "to blame." But more often it will be found that the aeroplane asked a degree of skill or watchfulness or concentration beyond that which can be expected at all times—especially in an emergency—than ordinary human beings.

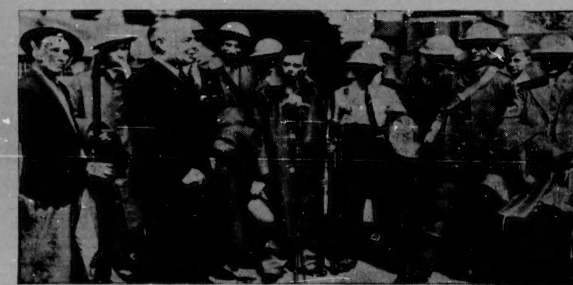

We believe that it is time that air accidents were looked more as an aircraft problem and less as a pilot problem. We believe that many aircraft flying today make too heavy demands upon the pilot. We believe that many aircraft are in certain circumstances, positively unsafe.

The Handley Page slotted flap has been in existence a great many years. It has been subjected to a

ROYAL SMILES AT SWIMMING GALA

"Double up, you're with the Navy" is what the King said to Princess Margaret Rose, referring to their somewhat cramped quarters, as their Majesties and the little Princess watched a swimming gala at the Royal Naval College at Dartmouth. The King and Queen appear to be highly amused at something going on in the tank.

SECRETARY OF WAR WITH NEW MILITIAMEN

Mr. Hore-Belisha, accompanied by the Director of Mobilization, General Wemyss, visited the new Army Militiamen at the Depot of the Queen's Royal Regiment at Guildford, Surrey. The Secretary of War is here shown speaking over the microphone to a group of men who have not yet completely shed their civilian garb.

long process of development. It has been tested in every possible way in the wind tunnel and on full scale. It has been examined theoretically and practically from every angle. It has been proved beyond any manner of doubt to be a safety device which guards effectively against the most serious risks to which aircraft are subjected.

A slotted wing guards against the involuntary spin or incipient spin. It gives stability and it aids control. But more important than its absolute value in these respects is its immediate and present value in relation to performance.

Today's search for high performance has led us to the machine with high wing-loading. Such machines tend to have high landing and taking-off speeds and long landing and take-off runs. These things being reduced, other things being equal, the shorter the taking-off and landing runs, and the lower the taking-off and landing speeds, the greater the safety.

Correct application of the Handley Page slotted wing, in its full form, enables the high performance, highly loaded machine of today to keep these important qualities of low speed and short distance when taking off and landing without any concomitant disadvantages.

It is essential that the fitting of the slots be correctly performed. Correctly fitted slots will be of the highest value. Incorrectly fitted slots will be of little or no value and would actually constitute a serious danger, in that their presence on the machine would naturally make the pilot with a false sense of security, which might render him subject to serious accident should he take those liberties which are normally possible with a correctly slotted aeroplane. We cannot emphasize too strongly, therefore, the absolute necessity of following correctly the data already accumulated on the proper installation of the slotted flap, the period of years the method of fitting the slotted flap has been studied in detail. The knowledge thus accumulated must be used or the slot will not be able to give as large an advantage as it can give. This data is now available in

the form of published reports throughout the world, but in the event of any difficulties arising Handley Page Limited are always pleased to offer their full advice on all questions relating to this subject. Accidents to aircraft must happen, but accidents to all kinds of transport vehicles happen occasionally. But today some of the accidents are unnecessary.

That is a serious charge to make, but we believe it to be justified. Investigation in the accidents that occur shows beyond any manner of doubt that some of them, perhaps many of them, would never have happened if the machines had been equipped with full wing slots, correctly fitted.

Our judgment on the part of the pilot threatens to take on an ironical significance. For if the pilot is asked to do things which are beyond the normal power of man, and he is not looked upon as an adequate reason for an accident—Handley Page Bulletin.

TEEPER CREEK

TEEPER CREEK, Aug. 11.—Several are harvesting and quite a few more will be doing so in a few days as the hot weather is ripening the grain very fast.

MANY AT LEGION PICNIC

Quite a lot from here attended the Legion picnic at TEEPER CREEK. The ball game between Teeper and Heart Valley was a good game from start to finish. The score was 2-3 in favor of Heart Valley.

Miss Foss from Grande Prairie spent ten days at the home of Elsie Rehm.

Mr. and Mrs. Maud Norman were from Grande Prairie visitors on Monday, taking their little girl in to get her tonsils removed last Tuesday. They were the guests of Wm. Bailey in town.

Cliff Rehm and George Love were in to the hospital Monday and had their tonsils removed, coming home on Tuesday. All are doing fine.

Mrs. Chas. Adams of Bad Heart spent last week visiting her daughter, Mrs. Maud Norman.

Both meetings of the Pool and U.G.G. were well attended at the school-house last week. Monday, July 30, and Saturday, August 2.

Mrs. Adams and Mrs. Maud Norman visited at the home of Mr. Harold Love on Tuesday, August 1; also Mr. and Mrs. Scott McQuigg and Mrs. McQuigg, Sr., and Mr. Bert Briggs.

Mrs. Milan Fraser was expected home on Tuesday from Edmonton, where she underwent a serious operation. We are glad to see Mrs. Fraser home again.

ANNELLEN

ANNELLEN, Aug. 11.—A hailstorm accompanied by a high wind passed through this district July 30, doing considerable damage. Carson's, like Walker's, Jim MacPherson's and Halvor Lindholm's oats were the hardest hit, with only stubble left. Tom Walker's, Little's, Geiger's and Tschetter's oats were badly shelled. The wheat and barley seemed to be more resistant and promises to yield a good crop if all goes well.

The grain is ripening and some expect to start cutting the end of this week, which will be the earliest harvest in this district.

WIN FIRST PLACES AT ELKS' SPORTS IN HYTHE

Several children of the district attended the Elks' sports in Hythe on the 2nd. Gordon Bone came first in running and jumping for boys of 12 years and under, Arta Matheson

came first and Dorothy Resaume second in the girls' jumping, 14 years and under.

The treats and picture show were greatly enjoyed by all the youngsters and the Elks deserve a lot of credit for their interest in the children of Hythe and surrounding districts.

May Tschetter is visiting her sister Lena at Valhalla.

Mrs. Resaume went to Grande Prairie on July 28, returning on the 31. Lyle and Juanita went to Clairmont, where they will work during harvest.

Jones' dam is quite popular with the young people these hot days.

Misce Dance and Keiller of the Anglican Sunday school won spent a few days calling in the district. The kiddies are always glad to see them.

Mr. and Mrs. Wm. F. Forbes and Gerald left on the 9th for Victoria, B.C. Our best wishes go with them.

Mr. Carson brought home a new rubber-tired binder.

Harold Forbes took a car full of berry-pickers to Saskatoon Island.

Wedding Bells

BANNISTER-HALWA

A wedding of wide interest to residents of Faust, Alberta, and surrounding districts took place on Wednesday, August 9, when Caroline Irene Halwa, eldest daughter of Mr. and Mrs. S. J. Halwa of Grande Prairie, was united in marriage to Allan Henry Bannister, eldest son of Mr. and Mrs. W. H. Bannister of Faust.

The bride was charming in a dress of white sheer, with shirred bodice and flared skirt. Her hat was of white felt trimmed with fine net veil, and she carried a bouquet of giant peace lilies and white roses.

The wedding party left Faust by car at 9 a.m. for High Prairie, where the ceremony was performed at 11 a.m. at the Roman Catholic Church, with Father Gould officiating. Allan Plante acted as bridesmaid and Cyril Bannister, brother of the groom, was best man, with Mr. and Mrs. Ben Norberg as first witnesses.

Those in attendance at the ceremony were Mr. W. H. Bannister, Cyril Bannister, Mr. and Mrs. F. L. Pruden, Dorothy Pruden, Lawrence Pruden, Mr. and Mrs. Ben Norberg, Mrs. V. M. Woodard, Donald Woodard, Mr. and Mrs. A. Jones and Alice Plante, all of Faust, and also Rev. and Mrs. S. G. West of High Prairie.

Immediately after the service the wedding party returned to Faust and a sumptuous dinner was served at the home of the groom's parents, Mr. and Mrs. W. H. Bannister.

After a motor trip to Banff and all points south, the happy young couple will make their home in Faust, where the groom is very well known, having resided here with his parents for the past twelve years.

NEW BARN COMPLETED

CLAIRMONT, Aug. 14.—Anthony Gowan has completed his new barn, which is 30x38 feet. Not only that but already 30 tons of hay are stored in the loft. Jack Christian was the contractor.

BRINGS INSTANT EASE from PAINS, SPRAINS, BRUISES, BURNS, RHEUMATIC ACHES

MINARD'S GREAT CANADIAN RUBBING LINIMENT

MINARD'S LINIMENT

"NOW I GET THIS 3-WAY HELP AT BREAKFAST"*

2000 Housewives Can't Be Wrong! In a recent impartial survey, more than 2000 housewives from Halifax to Vancouver were asked: "What brand of Corn Flakes do you like best?" Kellogg's Corn Flakes were named first choice more than FIVE TIMES as often as the next brand! They win on flavour—and they're so easy to serve... literally a "30-Second Breakfast."

No wonder Kellogg's Corn Flakes are Canada's most popular ready-to-eat cereal! Order several packages today. Made by Kellogg's in London, Canada.

Get a Head Start Every Day with

Kellogg's CORN FLAKES

*Every morning your breakfast should do these three things:

- 1 Gently WAKE you sleepy stomach! The very sight of crisp Kellogg's Corn Flakes makes your mouth water—quickly rouses your sleepy system.
- 2 TART you quick! Full of energizing carbohydrates "fuel," Kellogg's Corn Flakes help you start the day "in high."
- 3 Help KEEP you going! A brimming bowl of Kellogg's Corn Flakes, with cream and sugar, releases energy for hours—helps keep you going strong till noon.

TESTED RECIPES

The raspberry is really the most important bush fruit grown in Canada. It is now in season, and the recipes given below may prove useful to housekeepers.

Raspberry Sauce
(for puddings or ice cream)
2 cups raspberries
1/2 cup fruit sugar

Crush berries with sugar and allow to stand for one-half hour. Press through a fine sieve, beat well with a fork, and chill before using.

Raspberry Cake
1/2 cup brown sugar
1/2 cup butter
2 eggs
1 cup raspberries
2 cups flour
1 tablespoon milk
4 teaspoons baking powder

Cream butter and sugar; add eggs yolks and beat well; add berries and milk, then the flour sifted with baking powder. Lastly, fold in the stiffly beaten whites of eggs. Bake in a buttered loaf pan at 350 degrees F. for 40 minutes.

Raspberry Jelly
Pick over and put the raspberries in a double boiler to draw out the juices. Then strain and measure the juice. Allow 3/4 of a cup of sugar for every cup of juice. Boil juice rapidly for 20 minutes, add the warm sugar, and continue boiling until the temperature reaches 220 degrees F. If a firmer jelly is desired, apple juice may be used in proportion of half and half, or one-third raspberry juice to two-thirds apple juice.

Canning Raspberries
There are two methods for canning raspberries. One method is to pick over and wash the fruit. Pack in sterilized jars as closely as possible without crushing. Fill to overflowing with syrup made with one cup of sugar to two cups of water. Sterilize for 16 minutes.

The other method is by raw canning, by which raspberries may be sterilized so as to retain their natural shape, color and flavor without actual cooking. Pack the raspberries in hot, sterilized jars. Fill jars with boiling syrup (at a ratio of one cup of sugar to two cups of water) and seal tightly. Place jars in a washbowl or similar vessel, and fill it with enough

boiling water to reach the tops of the jars. Place a blanket over and leave until cold. If using screw-top jars, tighten occasionally as the water cools. Invert the jars to test for leaks.

UTILITY OF MILK
Many things are being made from milk quite apart from the usual dairy products. In Canada there are several factories for making casein from milk and from casein other firms make buttons, imitation ivory, furniture glue, binder for paints, stains and many other commodities. One factory buys whole milk, skims it and makes butter from the cream. The skim milk is used in casein; the lactose, or milk sugar, is used as a supplement in baby food; the albumen is separated out and being rich in protein and Vitamin C, is used as an animal concentrate. In fact all that is left when this firm is done with milk is water.

Canada, Argentina, and Australia provide the bulk of the wheat entering world trade. Exports from the United States, the Soviet Union, and the Danubian countries show wide fluctuations but are often substantial.

BACON IS WHAT YOU MAKE IT When a Farmer FEEDS Grain to a Hog he SELLS Grain to that Hog

The Hog PAYS in Pork...

AND THE HOG PAYS WELL! Properly fed, 350 lbs. of grain makes 100 lbs. of pork. Rail-grade prices are based on dressed weight... so well-fed hogs when Rail-Graded, pay the highest prices for their feed.

But "well-fed" does not mean over-fed. Good feeding calls for a balanced ration of grains and proteins. Grain, by itself, is not sufficient to develop and bring your hogs to market requirements economically. Proteins of animal origin, such as skim milk and tankage, are of equal importance. Proteins promote growth and save grain.

This representative Feeding Trial, with three lots of 21 pigs each, shows how grain may be saved and cost of production lowered by feeding protein supplement:

	Lot 1 Grain & Protein Supplement "A"	Lot 2 Grain & Protein Supplement "B"	Lot 3 Grain alone
Days on Feed	119 1/2	129	214
Daily Gain	1.31 lbs.	1.24 lbs.	.74 lbs.
Grain eaten per 100 lbs. gain	\$21.63	\$22.76	\$31.84
Cost of Hog per 100 lbs. gain	\$6.14	\$5.97	\$7.38

The feeding of Protein Supplements saved 219 to 290 lbs. of Grain, or from \$2.48 to \$2.82 per 100-lb. Hog.

THE BALANCED RATION GAVE THESE HOGS THE OPPORTUNITY TO PAY THE HIGHEST PRICE FOR FEED—AND THEY PAID IT!

The Dominion Experimental Farms from coast to coast, raise and feed hogs to obtain unbiased breeding and feeding facts. For information on hog feeding and production apply to the Superintendent of the Dominion Experimental Farm serving your district, or direct to: Dominion Department of Agriculture, Ottawa.

Postmasters ... Hundreds

(Continued from Page One)

Mr. Taylor at the outset of his address observed that he believed that anyone who belongs to an organization should be willing to support it. So far as he was concerned he was only too glad to do all in his power for the organization.

Continuing, Mr. Taylor, said that he was glad to be in a country of which Mr. McDonald had always talked, about when in attendance at the provincial convention. He congratulated the chairman on the splendid organization in the Northern Division.

Mr. Taylor then reviewed what had been accomplished during the past year.

In his annual address Mr. McDonald said that he had been attending conventions for the past 12 years and had watched with interest the progress of the association in its efforts to secure better conditions for the postmasters.

Seven years ago he made the suggestion at a provincial convention that a convention of northern postmasters be held in the Peace River. This request was finally granted and the first convention was held at Grande Prairie in 1932, giving the postmasters of the Peace River District an opportunity to learn more about what the association was doing and gave them a chance to join forces to get better conditions.

Mr. McDonald thanked the postmasters for the splendid support they had given their organization and urged them not only to attend local conventions but, when possible, also to attend the provincial one.

A resolution was passed by the assembled postmasters extending a welcome to His Excellency Lord Tweedsmuir, Governor General, and Lady Tweedsmuir, who arrived in Grande Prairie Thursday morning. There was some discussion on the value of teaching school pupils the rules of the postal department. It was pointed out that this had been done in several sections with most beneficial results.

The balance of Wednesday's session was taken up with general business. In the evening postmasters and officials were guests at a T. Eaton Company at the Capitol Theatre.

The convention adjourned Thursday afternoon at 1 o'clock, the later hour being necessary because of the visit of the Governor General to Grande Prairie in the morning.

(Continued from Page One)

His Excellency chatted with Mrs. Spaulding, mother of Mrs. T. M. Newton, who comes from the same place in Scotland as he does and is well acquainted with his family.

Following the inspection and introductions the viceregal party were taken by car to Richmond Hill golf course, where His Excellency expressed himself as delighted with the view. After chatting with Pro. Stevenson, who also hails from the "Land of the Heather," the party returned to their train at Grande Prairie and proceeded to Beaver Lodge Experimental Substation, where they spent an hour seeing the flowers there and meeting a large crowd.

The viceregal party then proceeded to Dawson Creek, where a royal reception awaited them.

In the party with His Excellency were Lady Tweedsmuir, two of their sons, Hon. John N. S. Buchanan and Hon. Alastair F. Buchanan, the governor general's brother and sister, Walter Buchanan, who is a banker at Peebles, Scotland, and Miss Anna Buchanan, who is widely known as a Scottish author under the pen name of "O. Douglas," and one aide-de-camp, Lieut. Scott, R.N.

J. M. McArthur, manager of the N.A.R., accompanied the viceregal party.

Blueberry Mountain

TWENTY-TWO AT GOOD WILL CLUB MEETING

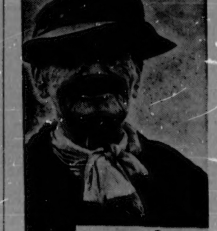

BLUEBERRY MOUNTAIN, Aug. 16.—The monthly meeting of the Good Will Club was held at the home of Mrs. Grenache, about 22 members being present. Many items of community interest were discussed.

A resolution was passed by the assembled postmasters extending a welcome to His Excellency Lord Tweedsmuir, Governor General, and Lady Tweedsmuir, who arrived in Grande Prairie Thursday morning.

There was some discussion on the value of teaching school pupils the rules of the postal department. It was pointed out that this had been done in several sections with most beneficial results.

The balance of Wednesday's session was taken up with general business. In the evening postmasters and officials were guests at a T. Eaton Company at the Capitol Theatre.

The convention adjourned Thursday afternoon at 1 o'clock, the later hour being necessary because of the visit of the Governor General to Grande Prairie in the morning.

PENSIONER

OLD AGE PENSIONERS DEMONSTRATE

Organized by the National Old Age Pensioners Association, a demonstration was held in Hyde Park, London, which was attended by pensioners from all parts of the United Kingdom. The demonstration was a petition to the Prime Minister asking increased pension rates. One of the speakers was Mrs. Gritton (above), 77 years old, of Harrow Road, London. She started work when 10 years old filling dirt bottles at sixpence per week. As the widow of a Royal Engineer she has a pension of one shilling per week.

Local and General

P. V. Croken has returned from a business trip to Edmonton.

Miss K. Gossen of the Municipal Hospital staff, left on Tuesday's train to visit her parents at Courtenay, B.C.

G. G. Hurley of Salem, Oregon, was a passenger on Tuesday's train, en route to Beaver Lodge, to visit his brother Gordon. The visitor commended the Beaver Lodge district in 1918, leaving for the country south of the line in 1922.

E. A. Smith and Mrs. W. D. Albright of Beaver Lodge arrived home from Niagara Falls on Tuesday, where they attended the Christian Convention.

Margaret Stewart leaves on Monday for Winnipeg, where she will go in training at the Children's Hospital.

J. Butterfield, provincial government sanitary inspector, is on his annual tour of inspection through the Peace River.

E. M. Bliss was a business visitor to Dawson Creek last week. He reports business good.

Mrs. Ivan Fowler of Thurlton returned on Friday's train from Edmonton, where she was attending the teachers' summer school.

Tom Fawkes of Huelien is well on the way to recovery after a long illness. He left on Tuesday to spend a few weeks at Cooking Lake near Edmonton.

F. G. Pawkes, weed inspector for the Municipal District of Bear Lake, was a visitor to Edmonton on Friday.

H. C. Neill of the Edmonton postal service spent a few hours in Grande Prairie on Sunday, having come from Vancouver by plane. In the evening he proceeded to Edmonton by plane.

E. H. Keith of Scenic Heights, director of the Alberta Wheat Pool, took the plane at Grande Prairie for Edmonton. From there he will proceed to Calgary and attend a meeting of the directors of the Pool.

The mother of Miss Hamilton of the Municipal Hospital arrived in Grande Prairie last Friday.

Mrs. G. F. Olson, mother of Mrs. G. Russell of Grande Prairie, left for Brockville, Ontario, Friday morning after a very pleasant visit with her daughter.

Mrs. L. A. Walker went to Edmonton Friday morning.

Miss McIntosh left for Vancouver Friday morning of last week.

Mr. and Mrs. Geo. Russell journeyed to Edmonton Friday morning to visit the capital city for a little while.

Frank Edmundson and family arrived back in Grande Prairie last Friday from an enjoyable vacation spent in Spokane, Washington.

Mr. and Mrs. W. B. W. Bush of Hazelton were visitors in the Prairie on Monday. Mr. Bush stated that there would be a fair average crop and cutting should be general the latter part of this week.

Mrs. J. A. Brenner of Rio Grande was en route on the Grande Prairie Municipal Hospital on Monday forenoon.

Charlie Gentel of Edmonton is a visitor in Grande Prairie this week. To the Herald-Tribune reporter he said that he was looking over this district.

Art Southworth, Dennis Law and Doris Gant returned from a holiday trip to Monks Lake on Monday evening. They report a delightful holiday. Their only regret was that they had to pack in from Kinuso Falls.

Mrs. L. G. Fredette and daughter, Hove, arrived home from Edmonton on Sunday night, where they spent three weeks visiting friends.

Mr. and Mrs. Earl Sanderson of Hinton Trail were callers at the Herald-Tribune office on Tuesday. They were greatly interested in the printing plant.

Miss Gertrude Rutley of Edmonton, who was visiting Mr. and Mrs. George Swanton and Mrs. A. Houseworth, returned home on Tuesday's train.

Following a very successful and enjoyable Monks Pass trip, Francis Donald and Bob Waddell returned to Beaver Lodge on Friday night.

Mrs. P. V. Croken is on a fall buying trip to Montreal.

Bob Jerry of Peace River spent Wednesday and Thursday at Grande Prairie after spending ten days with "Scotty" Boyd of Beaver Lodge.

Elmer Golem, 12 years old, son of Mr. and Mrs. Wm. Golem of Grande Prairie, was taken to the hospital on Wednesday afternoon.

Miss Jean and Miss Margaret Connelly, first-class inspectors, are on holiday trip through the Peace River. They recently took a trip to Monks Lake. The young ladies, who are school teachers, are enjoying their trip here immensely.

Mrs. George Hart of Pouce Coupe is visiting her daughter, Mrs. Dever.

Mrs. H. L. Vaughan and little daughter have returned from Vegreville, where they have been visiting Mr. and Mrs. J. E. Stewart. Mr. Vaughan also spent ten days at Vegreville before returning home.

W. W. Bason, representing RCA Victor Company Limited, of Edmonton, is covering Grande Prairie and district.

As indicated by the returns for the annual June survey, there were increased sowings of flaxseed in 1939 in Manitoba, Saskatchewan and Alberta, the area in the three provinces being computed at 317,600 acres, compared with 212,700 acres in 1938.

Pears, more than any other fruit, are affected by temperature changes, temperature being held to be the most important single factor relating to their handling, particularly in cold storage.

H. L. VAUGHAN TAKES MASTER CLASSES IN PIANO PLAYING

H. L. Vaughan returned last week from Edmonton, where he took master classes in pianoforte playing technique and pedagogy from Jacques Jolas, under the auspices of the University of Alberta.

Mr. Vaughan reports that the 35 teachers and advanced students from all parts of Saskatchewan and Alberta were all enthusiastic about the work of Mr. Jolas, and are hoping that he will give a similar course in Edmonton next July.

In the United States Mr. Jolas is accepted as one of the leading pianists of the day and for the past eight years has been affiliated with the Juillard Foundation of New York.

Mr. Jolas has gone on to Banff, where he gives a similar course at the Banff School of Fine Arts.

SUCCESSFUL PIANO PUPILS

Jean Reesor and Doris Beaulne, both of Pouce Coupe, passed their piano exams with First Class Honors. They are pupils of Mrs. J. H. Sherwood, A.T.C.M., Dawson Creek.

BELL-FLEMING HARDWARE LTD.

GRANDE PRAIRIE, ALBERTA

To The Herald-Tribune.

Your success has been accomplished by your own and supporting efforts by the business men, the farmers, your reporters at the various points, and last but not least your staff. We wish you continued success. We hope your political policy will be a steady middle course, carefully thought out and in the interest of the people generally.

In new furnishings for your office we invite you to call and see what we have to offer. Our stock has favorably surprised others, we think it will you.

A C.C.F. Meeting of Grande Prairie Poll

will be held on

Friday, Sept. 1, 8 p.m.

In the dining room of the Grande Prairie Hotel for the purpose of electing three delegates who will assist in the selection on Sept. 4 at 2 p.m. a C.C.F. candidate for the Provincial Constituency of Grande Prairie. All parties in Grande Prairie constituency are requested to be represented by three delegates chosen either before or early on convention day.

I. V. MACKLIN, Constituency Secretary

Our best wishes go to the combined paper, The Herald-Tribune, believing that the Grande Prairie district will be better served than ever before.

Barber-Ellis of Alberta, Limited

Edmonton, Alberta

The value of a weekly newspaper as an informant of local and world events makes it an indispensable asset to all those interested in the progressive activities of their district.

Our best wishes go to the combined paper, The Herald-Tribune, believing that the Grande Prairie district will be better served than ever before.

Barber-Ellis of Alberta, Limited

Edmonton, Alberta

Congratulations

The Grande Prairie district is to be congratulated on the amalgamation of its two newspapers, The Herald and The Tribune, now to be published as The Herald-Tribune.

Both papers have established splendid reputations as representing all that is best in the weekly newspaper field, and by amalgamation of effort the publishers have taken a step that must prove profitable to themselves and of immense benefit to the large district which they serve.
